

**SAG-AFTRA**

# NATIONAL CONVENTION

---

## QUICK GUIDE

## Convention Tech Tips

### Use a Desktop or Laptop Computer

Mobile devices are not recommended for accessing the virtual convention.

### Check for Software Updates

Make sure your computer has up-to-date software that lets you fully participate in the convention.

### Test Your Internet Connection

Make sure you have strong Wi-fi and high-speed internet. Removing other devices from your Wi-fi, while not in use, will help boost your connection speed.

### Keep Your Browser Updated

Make sure you use the latest version of Google Chrome, the recommended browser for convention.

### Keep Zoom Updated

Make sure you use the most up-to-date version of Zoom. Also, you must create, or already have, a Zoom account with the same name you listed when registering for convention so we can identify you.

### Disable Pop-up Blockers

Disable pop-up blockers on your devices during the convention. Parts of the convention will open in new tabs or as new windows.

### Watch for Browser Alerts

Outside of Zoom, most of the convention is browser-based. No download is required. Please look out for alerts that allow your browser to access your audio, video and camera for chatting and speaking functions.

### Find Lost Login Info

If you misplaced your login info or need general help, contact [convention@sagaftra.org](mailto:convention@sagaftra.org) for assistance.
